Editorials

NIMB Editorial for 2006, H.H. Andersen, L.E. Rehn and C. Trautmann 243 (2006) 1

Basic Data for Materials Modification and Analysis

Dispersion corrections to the forward Rayleigh scattering amplitudes of tantalum, mercury and lead derived using photon interaction cross sections, S.B. Appaji Gowda and T.K. Umesh 243 (2006) 2
Molecular dynamics simulations of the initial stages of sputter erosion of a metal overlayer system: 2 keV Ar → Cu/Ni(1 0 0), M.A. Karolewski 243 (2006) 6
Electrical characterization of oxygen-induced nanosized ripples on aluminum thin films by conductive atomic force microscopy, P. Mishra, P. Karmakar and D. Ghose 243 (2006) 16
Excitation functions of long lived products in deuteron induced nuclear reactions on platinum up to 40 MeV, F. Ditrói, F. Tárkányi, J. Csikai, M.S. Uddin, M. Hagiwara, M. Baba, Yu.N. Shubin and S.F. Kovalev 243 (2006) 20
Ejected electron energy distribution in the ionization of atomic hydrogen by C^{6+} impact, R. Dey and A.C. Roy 243 (2006) 28
Experimental determination of L subshell fluorescence yields of Ba, La and Pr using synchrotron radiation, N.M. Badiger and E.V. Bonzi 243 (2006) 34
New evaluation of alpha decay half-life of ^{190}Pt isotope for the Pt–Os dating system, O.A.P. Tavares, M.L. Terranova and E.L. Medeiros 243 (2006) 256
Equilibrium charge-state distributions for S and Si ions emerging from iron and gadolinium targets with velocities near their K-shell electron velocity, A.E. Stuchbery, A.N. Wilson and P.M. Davidson 243 (2006) 265
Monte Carlo simulations of positrons transmission and backscattering probabilities in nickel, A. Aydın 243 (2006) 272

Atomic Collisions in Solids

The XPS investigation on the PC films irradiated by MeV C_n^+ ($n = 1$–5) cluster ions, J. Dai, Z. Zhao, J. Zhai and L. Jiang 243 (2006) 38
Repulsive interatomic potentials for noble gas bombardment of Cu and Ni targets, M.A. Karolewski 243 (2006) 43
Encapsulation of radioactive isotopes into C_{60} fullerene cage by recoil implantation technique, S.K. Saha, D.P. Chowdhury, S.K. Das and R. Guin 243 (2006) 277
Polarization effects for pair creation by photon in oriented crystals at high energy, V.N. Baier and V.M. Katkov 243 (2006) 282
Memory effect on energy losses of charged particles moving parallel to solid surface, C.M. Kwei, Y.H. Tu, Y.H. Hsu and C.J. Tung 243 (2006) 293

Ion, Electron and Photon Beam Modification of Materials

Stress-induced magnetic anisotropy in Xe-ion-irradiated Ni thin films, K. Zhang 243 (2006) 51
Infrared spectroscopy analysis of physico-chemical modifications induced by heavy ions in ultra-high molecular weight polyethylene, V.C. Chappa, M.F. del Grosso, G. García-Bermúdez and R.O. Mazzei 243 (2006) 58
Low energy oxygen ion beam modification of the surface morphology and chemical structure of polyurethane fibers, K.H. Wong, M. Zinke-Allmang, W.K. Wan, J.Z. Zhang and P. Hu 243 (2006) 63
Room-temperature deposition of diamond-like carbon field emitter on flexible substrates, H. Chen, M.N. Iliev, J.R. Liu, K.B. Ma, W.-K. Chu, N. Badi, A. Bensaoula and E.B. Svedberg 243 (2006) 75
Furthering the understanding of ion-irradiation-induced electrical isolation in wide band-gap semiconductors, A.I. Titov, P.A. Karaseov and S.O. Kucheyev 243 (2006) 79
Effect of heat treatment on helium trapping in vanadium alloy at high ion implantation fluence, X. Liu, T. Yamada, Y. Yamauchi, Y. Hirohata and T. Hino 243 (2006) 83
Annealing of radiation damage in (1 0 0), (1 1 0) and (1 1 1) MgO single crystals implanted with Ar^+ ions, I.O. Usov, P.N. Arendt, J.R. Groves, L. Stan and R.F. DePaula 243 (2006) 87
Bactericidal properties of silver implanted pyrolytic carbon, J. Zhao, H.J. Feng, H.Q. Tang and J.H. Zheng 243 (2006) 299
Swift heavy ion induced mixing in Fe/Ni multilayer, S.K. Srivastava, R. Kumar, A. Gupta, R.S. Patel, A.K. Majumdar and D.K. Avasthi 243 (2006) 304
Monte Carlo simulation of the transport of atoms in DC magnetron sputtering, S. Mahieu, G. Buyle, D. Depla, S. Heirwegh, P. Ghekiere and R. De Gryse 243 (2006) 313

doi:10.1016/S0168-583X(06)00015-2

The effects of atomic oxygen on polyimide resin matrix composite containing nano-silicon dioxide, X. Wang, X. Zhao, M. Wang and Z. Shen 243 (2006) 320
Helium gas-bubble superlattice formation in molybdenum, P.B. Johnson and F. Lawson 243 (2006) 325
Surface morphology of Cr_2O_3 coatings on steel irradiated by high-intensity pulsed ion beam, S.M. Miao and M.K. Lei 243 (2006) 335
Influence of MeV electron irradiation on the properties of by ion implantation hydrogenated polysilicon TFTs, P.V. Aleksandrova, V.K. Gueorguiev, Tz.E. Ivanov and S. Kaschieva 243 (2006) 340

Effects of Radiation

Decay of the pulsed thermal neutron flux in two-zone hydrogenous systems – Monte Carlo simulations using MCNP standard data libraries, U. Wiącek and E. Krynicka 243 (2006) 92
Modification of TiO_2 photocatalytic films by V^+ ion implantation, X.-G. Hou, F.-H. Hao, B. Fan, X.-N. Gu, X.-Y. Wu and A.-D. Liu 243 (2006) 99
Change of the energy loss of relativistic heavy ions in a gadolinium target at and above the ferromagnetic Curie temperature, F. Nickel, K.-H. Behr, L. Chulkov, H. Geissel, J. Klemm, O. Klepper, D. Marx, G. Münzenberg, E. Pfeng, J. Ružička, C. Scheidenberger and H. Weick 243 (2006) 103
Degradation of 3-amino-2-oxazolidinone (AOZ) in aqueous solutions by electron beam irradiation, Z. Liu, L. Song, C. Yang and H. Zhang 243 (2006) 109
Energetic ion irradiation of American diamond in a plasma focus device and characterization of irradiated material, S.R. Mohanty, N.K. Neog, B.B. Nayak, B.S. Acharya, P. Lee, T.L. Tan and R.S. Rawat 243 (2006) 113
Ion track formation below 1 MeV/u in thin films of amorphous SiO_2, J. Jensen, A. Razpet, M. Skupiński and G. Possnert 243 (2006) 119
Radiation damage of polypropylene fiber targets in storage rings, H. Rohdjeß, D. Albers, J. Bisplinghoff, R. Bollmann, K. Büßer, O. Diehl, F. Dohrmann, H.-P. Engelhardt, P.D. Eversheim, J. Greiff, A. Groß, R. Groß-Hardt, F. Hinterberger, M. Igelbrink, R. Langkau, R. Maier, F. Mosel, M. Müller, M. Münstermann, D. Prasuhn, P. von Rossen, H. Scheid, N. Schirm, F. Schwandt, W. Scobel, H.J. Trelle, A. Wellinghausen, W. Wiedmann, K. Woller and R. Ziegler 243 (2006) 127
Swift heavy ion irradiation effects on structural and magnetic characteristics of $RFeO_3$ (R = Er, Ho and Y) crystals, M. Bhat, B. Kaur, R. Kumar, P.A. Joy, S.D. Kulkarni, K.K. Bamzai, P.N. Kotru and B.M. Wanklyn 243 (2006) 134
Non-equilibrium Ta plasmas produced by fast pulsed lasers, L. Torrisi and S. Gammino 243 (2006) 143
ESR dosimetric properties of window glass, B. Engin, C. Aydaş and H. Demirtaş 243 (2006) 149
Effects of gamma-ray irradiation on optical properties of $ZnO–PbO–B_2O_3$ glasses, G. Sharma, K.S. Thind, Manupriya, H.S. Klare, S.B. Narang, L. Gerward and V.K. Dangwal 243 (2006) 345
The thermoluminescent (TL) kinetics parameters of the perovskite-like $KMgF_3$ activated by lutetium impurities, P.R. Gonzalez, C. Furetta and E. Cruz Zaragoza 243 (2006) 349
Comparison between electron-beam and chemical crosslinking of silicone rubber, M. Frounchi, S. Dadbin and F. Panahinia 243 (2006) 354
Monte Carlo simulations of complex geometries and an optimal ^{60}cobalt source design using the integrated TIGER series (ITS 3.0), A.B. Mohamed, J. Silverman, D.E. Weiss and M. Al-Sheikhly 243 (2006) 359
Structural and compositional modifications of fayalite Fe_2SiO_4 under electron irradiation, C. Davoisne and H. Leroux 243 (2006) 371

Analysis of Materials

Thermoluminescence characteristics of natural dolerite, F.O. Ogundare, F.A. Balogun, J.A. Olowofela, C.E. Mokobia and O.O. Fasunwon 243 (2006) 156
PIXE analysis of heavy metals in water samples from a mining area in Mongolia, O. Bolormaa, J. Baasansuren, K. Kawasaki, M. Watanabe and T. Hattori 243 (2006) 161
Phase transitions of natural corals monitored by ESR spectroscopy, V. Vongsavat, P. Winotai and S. Meejoo 243 (2006) 167
Equivalent dose determination of single aliquot regenerative-dose (SAR) protocol using thermoluminescence on heated quartz, D.G. Hong, M.J. Kim, J.H. Choi, N.A. El-Faramawy and H.Y. Göksu 243 (2006) 174
PIXE, ^{252}Cf-PDMS and radiochemistry applied for soil and vegetable analysis, K. Dias da Cunha, J. Cazicava, M.J. Coelho and C.V. Barros Leite 243 (2006) 179
Gamma-spectrometric uranium age-dating using intrinsic efficiency calibration, C.T. Nguyen and J. Zsigrai 243 (2006) 187
Determination of target mass from ISS data in the presence of inelastic losses, M.D. Coventry and R. Bastasz 243 (2006) 193
Ion beam analysis of PECVD silicon oxide thin films, F. Fernandez-Lima, J.A. Rodriguez, E. Pedrero, H.D. Fonseca Filho, A. Llovera, M. Riera, C. Dominguez, M. Behar and F.C. Zawislak 243 (2006) 200
Analysis of the accuracy of several methods for determining the concentration of $^{11}B^+$ implanted silicon, J.L. Duggan, F. Naab, K. Hossain, O.W. Holland, F.D. McDaniel, J.J. Xu, Z.Y. Zhao, B.N. Guo, J. Liu, K.H. Shim and U. Jeong 243 (2006) 205
AMS radiocarbon dating of the marine late Pleistocene–Holocene sediment cores from the western Ulleung Basin, East/Japan Sea, M.H. Park, J.H. Kim, B.J. Ryu, I.S. Kim and H.W. Chang 243 (2006) 211
Confirmation of germanium interference with hydrogen for prompt gamma-ray activation analysis, S.R. Biegalski, E. Alvarez and T. Green 243 (2006) 253
Evaluation of depth resolution with time-of-flight medium energy backscattering, R.D. Geil, B.R. Rogers, R.A. Weller and J.L. Hilton 243 (2006) 377
Quantitative non-destructive assay of PuBe neutron sources, L. Lakosi, J. Bagi and C.T. Nguyen 243 (2006) 385
Simple and accurate spectra normalization in ion beam analysis using a transmission mesh-based charge integration, M. El Bouanani, P. Pelicon, A. Razpet, I. Čadež, M. Budnar, J. Simčič and S. Markelj 243 (2006) 392
ESR dating of Soma (Manisa, West Anatolia – Turkey) fossil gastropoda shells, B. Engin, S. Kapan-Yeşilyurt, G. Taner, H. Demirtaş and M. Eken 243 (2006) 397
Analysis of iron gall inks by PIXE, M. Budnar, M. Uršič, J. Simčič, P. Pelicon, J. Kolar, V.S. Šelih and M. Strlič 243 (2006) 407

Ion Sources, Beam Optics and Accelerator Systems

Metal matrices to optimize ion beam currents for accelerator mass spectrometry, A.L. Hunt, G.A. Petrucci, P.R. Bierman and R.C. Finkel 243 (2006) 216
The X-ray distribution after a focussing polycapillary – a shadow simulation, A. Liu 243 (2006) 223
Development of a transport system for the copper source of the Texas Intense Positron Source facility, O. Doron, S.R. Biegalski, S. O'Kelly and B.J. Hurst 243 (2006) 247

Experimental Methods and Equipment

Compression of large area, high-current ion beams by an electrostatic plasma lens, Yu.M. Chekh, A.M. Dobrovolsky, A.A. Goncharov, I.M. Protsenko and I.G. Brown 243 (2006) 227
Application of neural networks to pulse-shape analysis of Bragg curves, J.J. Vega and R. Reynoso 243 (2006) 232
Mössbauer spectrometer with resonant detector, M. Mashlan, A. Kholmetskii, V. Yevdokimov, J. Pechousek, O. Verich, R. Zboril and R. Tsonchev 243 (2006) 241
Analysis of the glow curve of SrB_4O_7:Dy compounds employing the GOT model, F. Ortega, P. Molina, M. Santiago, F. Spano, M. Lester and E. Caselli 243 (2006) 417
Standard deviations of the error effects in preparing pellet samples for WDXRF spectroscopy, F. Demir, G. Budak, E. Baydaş and Y. Şahin 243 (2006) 423
Theory of the resonant filter for polarized radiation, K. Szymański 243 (2006) 429
A setup for probing ion–molecule collision dynamics, S. De, P.N. Ghosh, A. Roy and C.P. Safvan 243 (2006) 435
Laser ion source tests at the HRIBF on stable Sn, Ge and Ni isotopes, Y. Liu, C. Baktash, J.R. Beene, H.Z. Bilheux, C.C. Havener, H.F. Krause, D.R. Schultz, D.W. Stracener, C.R. Vane, K. Brück, Ch. Geppert, T. Kessler and K. Wendt 243 (2006) 442

Letters to the Editor

Development of a transport system for the copper source of the Texas Intense Positron Source facility, O. Doron, S.R. Biegalski, S. O'Kelly and B.J. Hurst 243 (2006) 247
On the origin of microcraters on the surface of ion beam bombarded plant cell walls, M.C. Salvadori, F.S. Teixeira and I.G. Brown 243 (2006) 250
Confirmation of germanium interference with hydrogen for prompt gamma-ray activation analysis, S.R. Biegalski, E. Alvarez and T. Green 243 (2006) 253
New evaluation of alpha decay half-life of ^{190}Pt isotope for the Pt–Os dating system, O.A.P. Tavares, M.L. Terranova and E.L. Medeiros 243 (2006) 256
Observation of intense PXR from textured polycrystal, Y. Takabayashi, I. Endo, K. Ueda, C. Moriyoshi and A.V. Shchagin 243 (2006) 453
Shell correction in stopping theory, P. Sigmund and A. Schinner 243 (2006) 457
